McTavish Competi- tion is Completed

JONES' AND MILLIGAN'S RINKS WIN OYSTER SUPPER

The final game in the McTavish "Oyster Supper" competition was played off on Monday night, Jones defeating Vanhook by a safe lead. Immediately after the deciding game the two winning rinks, Jones' and Milligan's, gathered at the National to claim the prize so generously donated by Mr. A. McTavish. The two rinks sat at one table, and while the oysters were being prepared Crush was served and after the oysters had disappeared the cigar box made its appearance. Jokes and speeches made it a jolly evening. Mr. Jones, on behalf of those present, thanked Mr. McTavish for the trouble and expense he had gone to. Finally, arising from the table, they gathered around their host and all joined in "For He's a Jolly Good fellow". Three cheers and a tiger brought this enjoyable event to a close. This has been a keenly contested series which took just the week to complete.

ED. NEFF "GRADUATES"

Mr. Ed. Neff, local representative of the Manufacturers Life Insurance Company, has reason to feel proud over his record of business written during 1928. Mr. Neff has just been officially notified that he has "graduated" into the Senior Club of the Company, an achievement made possible by his having written more than Two Hundred Thousand Dollars in business during the past year—Hanna Herald.

REV. A. G. GAY AGAIN ABLE TO TAKE SERVICE

Rev. A. G. Gay, Pastor of the Chinook United Church has recovered sufficiently from his recent illness to again take charge of the service, which will be held each Sunday at 3 p.m. Sunday School as usual at 2 o'clock.

LADIES' CARD CLUB

The Card Club met at the home of Mrs. Dawson on Tuesday evening of this week as usual. The prize being a buffet set, which was won by Mrs. Thompson. The Club will meet next week at the home of Mrs. J. S. Smith.

Funeral of the Late Mrs. Margaret Girven

The funeral of the late Mrs. Margaret Girven took place from the residence of her son, W. H. Girven, 367 Mark Street, Peterborough, at two o'clock on Saturday afternoon, January 19th, 1929. Many people from Peterborough, Lakefield and surrounding district gathered to pay their last tribute to one who was always willing to give a helping hand in any need.

The late Mrs. Girven was eighty-three years of age. She has resided in Lakefield since 1903 till last fall, when she came to reside with her son Herbert. Her husband, Robert Girven, predeceased her forty years ago. She leaves to mourn the loss of a loving mother, three daughters, Mrs. S. T. Sargent, Otonabee, Mrs. W. W. Isbister, Chinook, Alta., and Mrs. C. N. Sterling, Toronto, Ont., also two sons; James R. of Medora, Man., and Herbert, of Peterborough. One daughter, Mrs. Josiah Hunter, predeceased her sixteen years ago. Three sisters also survive: Mrs. Hendren, Lakefield, Mrs. McFee, Iowa, Mrs. Gratton, Otonabee, and one brother, John Webster, of Otonabee.

The pall-bearers were five nephews—Messrs. George Hendren, James Gratton, James Webster, Wesley Webster, Robert Girven and W. A. Fairbairn. Rev. Mr. Kemp, of Regent Street United Church, Lakefield, of which deceased was a faithful member, assisted by Rev. A. E. Thornley, of Mark Street United Church, Peterborough, conducted the service. Interment was made in Lakefield cemetery.

The many beautiful floral tributes showed the esteem in which the late Mrs. Girven was held.—Peterborough Examiner.

Lloyd Robinson is Elected Councillor

At the nomination meeting held in the Municipal Hall on Monday evening, Mr. Lloyd Robinson was elected by acclamation to fill the vacancy of Councillor on the local council, caused by the retirement of William Milligan whose term of office had expired.

LITTLE TOTS ENTERTAINED

A number of little tots were entertained last Saturday afternoon, at the home of Mrs. Myhre. The most amusing event of the afternoon was a Groundhog-making contest. Freda Milligan won first prize and Lorene Begon won second prize. The kiddies were treated to nuts, candies, oranges and refreshments.

Pro. Government Session Opens

Formal opening of the third Session of the sixth Legislature of Alberta took place on Thursday afternoon, January 31st.

The Speech from the Throne read by His Honor Lieutenant Governor Egbert, reviewed the satisfactory progress in many lines of activity made by the province during the past year and referred to a number of important questions on which legislation will be introduced at the present session.

The personnel of the legislature is unchanged from that of last year with the addition of Hector Lang newly elected Liberal member from Medicine Hat.

In view of the numerous important pieces of Legislation to be considered it is announced that evening sittings will be commenced at an earlier date than usual in order that the session may not be unduly prolonged. This has been made possible by the change in the end of the fiscal year and the fact that the budget is now available for consideration at an earlier date in the session than in previous years.

What a wonderful world this would be if it contained as many soft-hearted people as it does soft-headed.

Here and There

(226)
A skin game—Two young boys living 90 miles northwest of Edmonton started a coyote farm in 1927 by digging young coyotes out of the ground and confining them in a pen. They got 140 young animals and when their skins were mature sold them for \$12 each.

A southern packing plant specializes upon horse meat for shipment to parts of Continental Europe where it is very popular. It has been suggested that the nondescript range horses straying about Southern Alberta be herded for packing purposes. It is a pity someone could not figure out a similar way of consuming some of the old motor cars that are loose on the highways.

Twenty oil-burners measuring overall 37 ft. in length and weighing 725,000 pounds have been ordered by the Canadian Pacific Railway and will be in passenger and freight service through the mountains this summer. Each of them will do the work of two or more of the lighter locomotives. They are the largest in the British Empire and will revolutionize transportation in the west, it is predicted.

Victoria is having a mid winter golf tournament open to members of the local clubs and to guests of the Empress Hotel, and the players won't have to play in mittens and fur coats. In the east they have a game called winter golf that they play with bow and arrows on snowshoes, but the golf at Victoria is the legitimate article. The game is played the year round in the equable climate of the Pacific coast.

Unique and luxurious cars, differing from anything operated in this country before, will be carried by the two crack trains of the Canadian Pacific Railway, the Trans-Canada Limited between Montreal, Toronto and Vancouver, and the Mountshier, from Chicago to the Pacific coast. It has been announced. The cars will have bath rooms, valet service, lounge and smoking space, and a solarium, with vitreous windows.

The sea is constantly productive of tales of adventure. A recently told story is that about Commander S. Robinson, O.J.E. of the Canadian Pacific liner Empress of France who turned his ship into the face of a hurricane and went 500 miles out of his course to take aid to injured seamen on a storm tossed Japanese freighter. The great liner waited beside the freighter, which had been badly battered by the huge waves and some members of whose crew had been injured, but found it impossible for boats to pass between the two ships to convey a doctor. After waiting for half a day the master of the Japanese ship reported that he could make port and the Empress of France continued on her interrupted voyage.

Economical Power for Years To Come!

John Deere Farm Tractor

In the John Deere Tractor you get power you can depend upon, month after month, year after year, at costs that are surprisingly low.

Great Power—Light Weight— You Want Both

In the tractor you buy, you want ample power to do your field and belt work in volume that will effect real economies.

But you don't want to drag around a lot of surplus weight to eat up power, fuel and oil. It's the successful combination of light weight, strength and power that makes the John Deere the outstanding value in the tractor field today.

Let us show you why the John Deere is the tractor best suited to your farm needs.

The Noxious Weeds Menace

This is an age of conventions. They are a natural growth and outcome of the more complex and highly organized development of modern life. They are, too, a recognition of the fact that the principles and methods of co-operation are, in many ways and to a large extent, replacing the old individualistic ideas and efforts of the past. This is not to say that the value of individual responsibility and initiative has been, or is to be, discarded; rather, that in this age of rapid transportation and communication the old isolation has disappeared and peoples and nations are brought close together. They must, therefore, act as units rather than as distinct and separate entities.

This by way of introduction to a reference to a recent gathering held in Saskatchewan at the call of the Provincial Minister of Agriculture, namely, the first Saskatchewan Weed Conference. It was not a large and spectacular convention as many present-day conventions are, but in the importance of the problem it met to consider, it took second place to none. And while it was a Saskatchewan conference, its deliberations and findings were of equal value to the other prairie provinces.

The conference was summoned in recognition of the fact that weeds are making tremendous headway in Western Canada, and that some action must be taken, over and above the preventive policies of the past, if the inroads of weeds and the consequent enormous loss to the farmers and the country as a whole is to be checked.

The conference was attended not only by officials of the Saskatchewan Government, municipalities and farmers' organizations, but by Dominion Government officials, representatives of the railways, mortgage and loan companies, manufacturers, business men, merchants—in a word, every organization having a vital interest in the productive capacity and prosperity of Western Canada.

It was frankly and unanimously agreed that the whole country must be aroused and organized in a campaign for the destruction and elimination of weeds. The only alternative is a rapidly decreasing agricultural production both in quantity and quality, smaller returns to the farmer, and decreased business and prosperity for all.

The duty and responsibility of the individual farmer in the matter of keeping his own land free of weeds was in no sense minimized, but it was recognized that, human nature being what it is, some men will neglect their duty, and while they themselves suffer as a result of such neglect, they also inflict loss upon their neighbors who are doing their duty, and upon the community and country as a whole.

The need, therefore, for concerted Government and municipal action was emphasized, and the absolute necessity, in the interest of all, for more drastic control recognized.

It was realized that not only must existing weeds be brought under control and eradicated, but that much more efficient measures must be taken and greater precautions observed to put a stop to the sowing of weed seeds and the propagation of the weed plants.

It is not possible in this article to discuss all the phases of this intricate problem, but at this season of the year, when farmers are beginning to think about and plan their work for the spring, one factor may well be stressed. That is, the importance of sowing good, clean seed and not a mixture of grain, good and bad, and weed seeds.

The astounding discovery was made by the seed drill survey conducted in Saskatchewan that 70 per cent. of the seed sown in the province was lower than No. 2, due largely to the inefficient operation of farm farming mills. In other words, while farmers and governmental authorities on the one hand are fighting weeds, the farmers in the sowing of their crops are planting thousands of bushels of weed seeds.

The first step towards victory over the weed enemy is to put an immediate and definite stop to the planting of weed seeds in prepared soil. If the propagation of weeds is continually carried on and assisted in this way, it must be recognized that the weed menace will grow, and that final victory will rest with it and not with the farmer.

The spring slogan for all Western farmers in 1929 should be: Look to your seed grain. See to it, above everything else, that it is good, clean seed. If weed seeds are sown, it is inevitable that weeds will be harvested. Remember, it is still exceedingly true in farming as in all the activities of life, that whatsoever a man sows that shall he also reap.

Silver Foxes for Italy

A number of silver foxes have been sent from Canada to ranches in the Italian Alps, where ranching conditions are stated to be ideal, and where the fox farming industry is showing a steady growth.

When the plumber died his wife took no chances. She buried his tools with him.

During the World War a person's equilibrium was tested for flying by an elaborate turning chair.

To Check "FLU," Grippe

Fights the Germs in the Throat Before They Invade Other Parts of the Body.

EFFECTIVE PREVENTIVE MEASURES EXPLAINED

Simple precautions taken now will enable you to fight dreaded "Flu" which is spreading rapidly through the whole country. The germs of influenza gain access to the body through the mouth and throat. Keep the throat healthy and you go a long way towards stopping the trouble. An effective means of prevention is to gargle the throat three or four times daily with Nerville. Half a teaspoonful of Nerville in water makes a most efficient gargle. The germ-killing properties of Nerville quickly destroy any bacteria in the mouth or throat. If the chest is sore, if the throat is hoarse, if you have a cough—be sure, to rub the neck and chest with Nerville. Every drop of it will rub in, and out will come the congestion.

Of course it is absolutely necessary to house-clean the system with Dr. Hamilton's Pills which stimulate the eliminating organs, and rid the system of disease-breeding wastes. This combination treatment of Nerville and Dr. Hamilton's Pills will give prompt and entirely satisfactory results.

Lieutenant-Governor Appointed

J. D. McGregor, Brandon, to Succeed Late Hon. T. A. Burrows
J. D. McGregor, Brandon, has been appointed Lieutenant-Governor of the province of Manitoba. Mr. McGregor succeeds the late Hon. T. A. Burrows who died in Winnipeg recently. Announcement of the appointment was made by Premier W. L. Mackenzie King at the conclusion of a meeting of the cabinet.

The Lieutenant-Governorship was offered Mr. McGregor several days ago, and from his home in Brandon he announced acceptance of the post, stating that he considered the appointment as a compliment to the agricultural interests of the province rather than to himself personally.

WAS ALWAYS AILING NEVER FELT WELL

Health Restored Through the Use of Dr. Williams' Pink Pills

"I am one of the many who have found new health through the use of Dr. Williams' Pink Pills," says Mrs. Everett Dove, South Nelson, N.B. "For some years I never felt well, and at times was so weak that I would be confined to bed. At the very best I was in an ailing condition and found it difficult at times to do my housework. I was subject to headaches, poor appetite, breathlessness at the least exertion, and very pale. Before Dr. Williams' Pink Pills were recommended to me I had tried several medicines, but without any good results. I had become completely discouraged and felt that I would always be an invalid. A friend strongly urged me to take Dr. Williams' Pink Pills, and finally I consented to do so, but without much hope that they would help, where other medicines had failed. But in this, to my joy, I was mistaken. I had not been taking the pills very long when I knew they were helping me. As I continued their use, I found my appetite improving, I slept better at night, and my strength was gradually returning. I continued taking the pills for several months, when I again found myself a well woman, and I believe that had it not been for Dr. Williams' Pink Pills I would today be a helpless invalid. The pills have since been taken by others in our family, with the same beneficial results. I strongly urge every weak woman to try this grand health-building medicine. If you will send your name and address to The Dr. Williams' Medicine Co., Brockville, Ont., a little book, 'Building Up the Blood,' will be mailed you postpaid. You can get these pills through any medicine dealer or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont."

Advances New Theory

Baltimore Physician Says Lack of Lime Makes People Irritable

More lime in the diet as a preventive for divorce was urged by Dr. George Walker, addressing the National Housewives, Inc., at Baltimore. Absence of lime, he declared, makes a woman nervous and a man cruel—hence family troubles result.

When there is every appearance of a home being wrecked Doctor Walker suggested that lime, as found in a pint of milk, added to the diet of a couple daily for two weeks in all probability would adjust matters, restore amiability and keep the home intact.

He also would add two oranges a day for each and a quarter pound of cold stew at least three times a week.

It Bids Pain Begone.—When neuralgia racks the nerves or humbug cripples the back is the time to test the virtues of Dr. Thomas' Electric Oil. Well rubbed in it will still the pain and produce a sensation of ease and rest. A trial of it will establish faith in it.

As a molecule of water passes through the pores of your skin it is like a man passing through a gate seven miles wide.

Recognized as a leading specific for the destruction of worms, Mother Graves' Worm Exterminator, has proved a boon to suffering children everywhere. It seldom fails.

New Air Service Planned

Air express and passenger service between Winnipeg and United States points will be established within a month on a tri-weekly basis, according to Capt. P. T. McCarty, president and operating manager of the International Airways, Inc., of Seattle. The service will be in co-operation with the Western Canada Airways, Limited.

How many people with an automobile today owned a horse and buggy in the days of not so long ago?

Nerville's Liniment for the Grippe and Flu.

W. N. U. 1771

Hydro Power Shows

Record Development

Dominion Now Has Total of 5,328,000 Horse-Power

With world interest centered upon the efforts being put forth in almost every country to secure additional supplies of low-priced power for the needs of industry, the recent official review of hydro-electric progress in Canada is of particular interest, indicating, as it does, that throughout the Dominion the greatest activity prevails in harnessing for industrial, commercial and domestic use the advantageously situated and ample water-power resources of the country.

During the year 1928 the energy of the water-wheels or turbines actually installed and brought into operation amounted to 550,000 horse-power, thus bringing the total for the whole Dominion to 5,328,000 horse-power. In addition to this large increase there are many projects under active construction, some of them nearing completion and others just recently initiated, whose combined installations will result in adding more than 1,200,000 horse-power to the country's total. There are also many projects of magnitude in the formative stage, some of which will undoubtedly be undertaken in the near future.

For the actual development, transmission, and distribution of the power capacity installed in 1928, together with that now under active construction, it is estimated that not less than \$330,000,000 will be required; while for every dollar expended in power development competent authorities have estimated that six dollars are required in its application. It is necessary, therefore, to visualize the effects throughout the country of the expenditure of an amount reaching, probably, \$2,300,000,000.

New Oriental Silk

Japan and China Have Invented Mixed Fibre Product

To combat American artificial silk manufacture, Japanese and Chinese manufacturers have invented a new silk fabric utilizing both real silk fibre and those of spruce wood in a combination, the sheen of which is expected to revolutionize the present market, according to a Yokohama exporting firm.

Artificial silk has seriously affected the production of cocoon silks in the Orient during the last two years. The new cloth is expected to reach world markets in the early spring.

For Scalds or Burns.—Dr. Thomas' Electric Oil is a standard remedy for the prompt treatment of scalds and burns. Its healing power quickly soothes the pain and aids a speedy recovery from the injury. It is also an excellent remedy for all manner of cuts, bruises and sprains, as well as for relieving the pains arising from inflammation of various kinds. A bottle in the house and stable saves many a doctor's and veterinary's fee.

A Peculiar Timepiece

Clock Made in Switzerland Looks Like Sun-Dial

A turtle tells you the time in a unique timepiece produced in Switzerland. At first glance, the clock appears to be a sun-dial with a circular tray, filled with water, set in the face. In this tray a small imitation turtle floats, carrying a piece of steel in its back. As the hour hand advances under the tray it attracts the turtle by means of magnet. If removed from the water and later replaced, the little turtle immediately swims across to the point on the tray directly above the hand, thus indicating the time. The eight-day clock mechanism is wound in the usual way, and regulated after the tray and the face of the timepiece are removed.

Weapon Appears Harmless

Pistol Found in New York Looks Like Fountain Pen

A "fountain pen" that spurs 33-calibre bullets was picked up near a street corner in New York City recently and turned over to the police. The tiny weapon, little longer than the width of a man's hand, is shaped to appear merely a harmless writing instrument. A few feet away, it would be mistaken for a real pen. Only when it is examined closely does the open muzzle at one end reveal its dangerous character. The pistol unsews in the middle to insert the cartridge. It is fired by pressing a small button, about the size of a pinhead, in the end of the weapon. This releases a spring that operates the firing pin.

The Adirondacks contain more than 100 scenic lakes.

Cuticura Soothes Burning Aching Feet

Bathe the feet for several minutes with Cuticura Soap and warm water, then follow with a light application of Cuticura Ointment, gently rubbed in. For tired, hot, irritated feet this treatment is most comforting. Cuticura Talcum is cooling and refreshing.

Three Hundred Years

To Prepare Grammar

Immortals of French Academy Still Working on Book

"The world of letters moves slowly. Witness the speed in action of the 'immortals' of the French academy; 293 years ago the body, the personnel of which remains numerically fixed at 40, although its component individuals change with deaths and new elections, announced that it was going to publish a grammar of the French language.

Now the permanent secretary of the academy promises that the book will actually go to the printer soon—probably in 1930.

At the time of its foundation in 1635, the French academy was pledged to undertake publication of three works. Ten years later it was announced that one of these, the long awaited grammar, was "being prepared." The "immortals," to whom two or three centuries are of slight import, have been preparing it, ever since.

Protect Your Children From "Flu," Grippe

A WARNING TO PARENTS!

Flue germs are everywhere today. They reach the system through the nose and throat. Mothers can protect their children in a very simple way.

Take a saucerpan of water, place it on a lamp or stove. Add a half teaspoonful of Catarrhazone to a pint of water, which is brought to a boil. Let the steam from the kettle fill the room so that the medicated air is breathed by the child. This germ-killing vapor disinfects the child's breathing organs and kills the "Flu" germs.

Catarrhazone Vapor stops cold, prevents Grippe, relieves Sore Throat, prevents Flu. Safe and efficient. Just as good for adults as for children. If you keep the air in your home disinfected with Catarrhazone Vapor you are well protected from dangerous Flu, Influenza, Grippe, and Colds. All druggists sell Catarrhazone in 50c bottles.

More Purchasing Power

The purchasing power of the people of Canada increased by half a billion dollars during 1928, when revenue from productive industries reached the record total of \$6,840,273,995, an increase over 1927 of almost \$500,000,000.

Shipping Sets New Mark

New Westminster Exceeds 1927 Record by Forty-five Ships

A new mark in shipping was set at New Westminster during 1928, exceeding by 45 ships the 1927 record of 153. The figure does not include the coastwise shipping, which is handled through the Department of National Revenue. The net tonnage of the ships handled through the harbor commissioners' office was 625,271 tons and the gross 984,368 tons, compared with 483,603 and 776,229, respectively, in 1927.

Exhausted from Asthma.—Many who read these words know the terrible drain upon health and strength, which comes in the train of asthmatic troubles. Many do not realize, however, that there is one true remedy which will usually stop this drain. Dr. J. D. Kellogg's Asthma Remedy is a wonderful check to this everlasting ailment. It has a countless record of relief to its credit. It is sold almost everywhere.

Built To Auto Design

First British Plane of This Type Put on Market

Britain's first airplane to be built to automobile design has been placed on the market under the name of Simmonds Spartan light plane.

The craft has four wings, which are interchangeable in the same way that the four wheels of an automobile are interchangeable. There also is a spare wing which is carried for emergencies.

The new machine is fitted with a four-cylinder air-cooled engine of 30-horse-power. It recently was tested on a non-stop flight from London to Berlin, 620 miles, in six hours.

Statue for Mrs. Pankhurst

Premier Stanley Baldwin has consented to unveil a seven-foot bronze statue of the one-time suffragette, Mrs. Emmeline Pankhurst, to be erected in Westminster this summer from publicly subscribed funds.

New Brunswick's contribution to Uncle Sam's Yuletide celebration included some 3,000,000 Christmas trees—the greatest number ever shipped from the province.

Minard's Liniment prevents Flu.

"Poltiness is one of the best investments known. It pays enormous dividends."

ASPIRIN

The whole world knows Aspirin as an effective antidote for pain. But it's just as important to know that there is only one genuine Aspirin. The name Bayer is on every tablet, and on the box. If the name Bayer appears, it's genuine; and if it doesn't, it's not! Headaches are dispelled by Aspirin. So are colds, and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Aspirin—at any drugstore—with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer manufacture. While it does, the Tablets will be stamped with this "Bayer Cross" trademark.

Progress Made In Development Of the Hudson Bay Route Shown In Report Recently Published

Up-to-date information on the progress made in the development of Canada's Hudson Bay route is contained in a report recently prepared by the Natural Resources Intelligence Service of the Department of the Interior in co-operation with the Department of Railways and Canals. The objective set on the extension of the Hudson Bay Railway during 1928 was Mile 460, thus bringing the steel within 50 miles of Churchill. Actually the steel reached Mile 462 thus accomplishing all that was expected and leaving only 18 miles to be constructed during 1929 to reach the tidewater terminus.

The mobilization of men and materials and equipment necessary to accomplish the work planned for 1928 on the railway and at the port is dealt with in the report. At the peak of operations during the season it is stated that 2,200 men were employed on the railway. At Churchill the preliminary operations on port development employed 439 men during the season and a feature of the operations was that the work was materially expedited by the use of airplanes which operated between Churchill and the end of steel.

The report points out that the visit to Churchill of Frederick Palmer, eminent British engineer, which resulted in the selection of that port as tidewater terminus, was in August, 1927. In a year more than a year from the date of Mr. Palmer's report, the railway had been advanced 106 miles from the point at which the Churchill extension leaves the original line to Nelson at Mile 356. In the operations of 1928 the equipment used on the Hudson Bay Railway work included three steam shovels, a track-laying machine and 12 locomotives. The past summer was a very busy one at Churchill in the construction of temporary docks and the commencement of permanent construction. During the navigation season some 16,000 tons of material sent in by sea from Halifax and Sydney were unloaded at the new port and the dipper dredges, "Churchill No. 1" and "Churchill No. 2," built at Montreal especially for the work, appeared on the scene as well as the hopper barge, "Chesterfield." A second hopper barge was also towed from Port Nelson to Churchill and added to the equipment. The arrival of the dredges clears the way for an early start on extending the development this year and large supplies of materials are now on hand for prosecuting the work.

Up to March 31, 1928, there had been expended on the work at Churchill, \$897,500 and during the present fiscal year to Nov. 30 there had been a further expenditure of \$2,561,000 making a total of \$3,458,500. The expenditure on the Hudson Bay Railway up to March 31, 1928, is given as \$20,780,248 and since that date up to Nov. 30, the report states, an additional \$2,606,000 had been expended, a total of \$23,386,248. The expenditures on the railway and port during the 1928 season alone exceed five million dollars. The cost of the railway, exclusive of ocean terminals, when completed it is estimated will be in the neighborhood of \$28,000,000.

The development of the ocean terminals will account for an expenditure of many millions more and other work in the development of Canada's northern transportation route includes the establishment of modern aids to navigation in Hudson Bay and Strait. The aerial expedition established by the Department of Marine and Fisheries at three points on Hudson Strait in 1927 continued its reconnaissance until late in 1928 and much useful information bearing on navigation was secured. As a result, strategic locations for aids to navigation are

being selected and these will include direction-finding devices which will be of invaluable assistance to navigators in those northern waters.

The report on "Progress in Development of Canada's Hudson Bay Route" reviews the history of the development of the Hudson Bay transportation scheme and includes a consideration of its economic aspects and of the mileages involved in the new rail and water route from various centres in western Canada to Liverpool. The report in mimeographed form is available on application to the director, Natural Resources Intelligence Service, Department of the Interior, Ottawa.

Canada's Vast Territory

Hard to Visualize Distance One May Travel Within Dominion The Free Press of London, Ont., says: "It is really staggering when one contemplates what immense distances one may travel in one direction and still remain on Canadian soil. Consider, for instance, the distance from London to Prince Albert and from Prince Albert to Peace River, and the sparsely-settled territory. The country is naturally eminently suited to agriculture, particularly to the growth of Canadian hard wheat, for which there always will be a greater demand than supply. Experiments are now being conducted that will produce a swift-ripening wheat to beat the early frosts. Immense timber resources also has the northwest; it is rich in minerals and has great undeveloped water power; in fact, ready at hand are the materials for a new section of Canada."

Winnipeg Newspaper Union

The well-bred woman demands dainty underwear that is practical at the same time. Style No. 794 will wear indefinitely made of good quality crepe de chine, batiste, voile, heavy georgette crepe, radium silk or flat silk crepe. The two-piece cummerbund with straight outline across the top, perforated to be trimmed with lace banding, has attached drawers with opening at center-back. It is especially easy to make, and only requires 1 1/2 yards of 40-inch material with 1 1/4 yards of 35-inch lace banding for the 35-inch size. Pattern comes in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Price 25 cents in stamps or coin (coin preferred).

We suggest that when you send for this pattern, you enclose 10 cents for a copy of our Fashion Magazine, showing all the most attractive Paris styles, embroidery, etc.

Pool Legislation

Full Protection For the Grower Must Be Assured Following a protest by C. E. Gregory, who attended a meeting of the private bill committee as legal representative of "a group of growers," Hon. T. C. Davis, attorney-general, announced in the Saskatchewan legislature, that it was the intention of the government not to declare law that part of the Wheat Pool incorporation bill that would limit the time for legal action to one year after the adoption of the report of the pool delegates on any one year.

Mr. Davis said that the amending clause would be included but would not be acted upon until such time as it had been referred to and approved by a meeting of the Pool delegates. Other sections that bring about retroactive legislation will stand in the original amending measure. By a later clause in the amending bill and one considered by the private bill committee, the retroactive element would not in any event apply to actions for accounting and for damages that might be before the courts or pending.

Mr. Davis admitted the Pool should not be subjected to a series of vexatious legal actions. But he declared, too, that while as full protection as possible should be afforded the Pool, the grower was also entitled to just as full a measure of protection. The legislation asked for, he claimed, was "dangerous." Nowhere, he said, could there be found in law a limitation to the time an action for accounting could be brought against a trustee and the Pool in handling the farmers' wheat merely acted as trustee for the farmers. If the Pool handled the property properly there was nothing to fear, and no need to place a limitation on time an action could be started.

The Careful Ones Pay

Higher Car Insurance Rates Prompted by Number of Accidents Motorists throughout the prairie provinces will learn with interest, perhaps with something of a feeling of dismay, of the 27 per cent. increase in motor car insurance rates in these provinces.

The increase does not apply to fire or theft, but has been prompted chiefly by the growing number of collisions or accidents of other sort, and is due to representations of the insurance agencies that they have either been losing money or else have been making inadequate profit. There is nothing for motorists who insure their cars—and the great majority of them do—to do but to pay the increase, but it is especially in case of careful motorists being made to pay for the carelessness of some of their fellow drivers. The announcement of the Western Canada Underwriters' Association should add zest to the campaign for safety in the streets and on the roads and highways. Many of the accidents in which motorists figure are wholly inexcusable.

Aunt Betty (reading nursery rhyme)—"The cow jumped over the moon." Do you believe that?" Modern Child—"Certainly not. That altitude record was never officially authenticated by the A.A.U."

Phyllis—"Why are you stanning open that letter so carefully?" Freda—"Oh, I've had a quarrel with Frank, and I want to see what he has to say before I return his letter unopened."

Considered Desirable Forage

Mixture of Peas With Oats a Success If Properly Sown (Experimental Farms Note)

Pea and oat mixtures are commonly grown and considered desirable forage in the older parts of Canada. In the west, however, they are grown very little, partly because less stock is raised and partly because any attempts to grow a mixture have proved failures. Various mixtures and methods of sowing have been tried out at Rothiem experimental station and this article embodies results derived from these tests during the last five years.

Three varieties of peas and two of oats have been used in mixtures and the most desirable combination we have found to be Victory oats and Mackay peas. Both are strong, tall growing, and mature at about the same time. This allows for harvesting at the best stage for forage, which is when the oats are turning color and the pods are well filled with peas.

Mixtures and methods of sowing used were: 25, 50 and 75 per cent. peas mixed with oats and sown together. Peas and oats were also sown in equal amounts separately, the peas being seeded one week and two weeks before the oats. Where mixtures were sown the drill was set at four bushels of oats per acre. Mackay peas and Victory oats were also sown alone for purpose of comparison.

Peas sown one week and two weeks before the oats gave the 75 per cent. mixture of peas yielded more cured hay than either oats or peas alone. Where 75 per cent. of peas were sown with the oats the percentage of pea vine at harvest was about 40, where peas were sown one week earlier than the oats the percentage of pea vine was 60, and where two weeks earlier, 70 per cent. The other mixtures yielded less than peas or oats alone and contained a small percentage of pea vine at harvest time. Sowing peas one week before the oats is possibly the best method of insuring a crop with a fair amount of pea vine each year. If the peas are sown two weeks previous to the oats, they get too strong a start and are likely to lodge before harvest, making cutting difficult; and where sown together the oats will overtake the peas and a small percentage of pea vine will be the result.

Where a pea and oat mixture is desired, we would recommend using Mackay peas and Victory oats. Sow the peas about one week before the oats and set the drill for each at two bushels of oats. Cut when the oats are commencing to turn in color to get the best quality of feed.

Had to Wash

The raw recruit was 30 seconds late on the morning of his first dress parade, and later on had to report at the orderly room.

"I am exceedingly sorry, sir," he apologized, "but I woke rather late, and there were only 10 minutes for me to dress."

"Ten minutes!" roared the angry officer. "Why, I can dress comfortably in less than 10 minutes!"

The recruit shifted his weight from one leg to the other.

"Yes, sir," he said innocently. "But I had to wash, sir."

Needed Rain

Farmer—How's your rheumatism this morning, Lucindy?

His wife—It doesn't bother me at this morning.

Farmer—That's too bad. We need rain terribly for the crops."

Channel Tunnel Scheme Between England and France Has Once More Been Revived

Planes Return From North Machines Cover 8,000 Miles in Search for Minerals

After an epoch-making flight into the barren lands, where air trails were blazed across the bleak wastes of the sub-Arctic in an aerial search for minerals, two cabin aeroplanes of the Dominion Explorers, Ltd., were brought to Winnipeg from the Far by Capt. E. W. Broatch and Capt. S. McMillan.

While in the north the 'planes were in charge of Capt. Charles Sutton, former Royal Air Force aviator and mail pilot on the Cairo-Bagdad route, and Captain Broatch, pioneer of the air trails of the frontiers of Canada. They made their base at Mistake Bay, about 150 miles south of Chesterfield Inlet.

The 'planes were taken into the north country by Captains Sutton and Broatch early in the summer, flying the machines in a long hop from New York to Hudson Bay. Two Moth 'planes also were used by the exploration party in the barren lands.

During the season the cabin machines covered more than 8,000 miles between them without mishap. Many of the flights over the barrens were beset with dangers, but the pilots dared the hazards of an unknown land, immeasurably aiding in the quest of rich minerals.

The main party of the expedition came south some weeks ago, but will return to the barrens in March.

Jap Living Standard Low

Large Per Cent of Workers Receive Less Than Fifty Dollars Monthly

That the living standard of most Japanese is still far below that in western nations is emphasized in a report by the ministry of finance. These figures show that 85 per cent. of the wage earners of Japan receive less than \$50 a month. There are 12,000,000 registered families in Japan, and in only 6 per cent. of these is the total income between \$50 and \$200 a month. The percentage of those getting more than \$200 a month is 1.3.

The contrast to the American standard may be appreciated when it is realized that the absolute minimum for a family of four or five, according to western custom, is in the neighborhood of \$300 a month. Living expenses in Tokyo for the foreigner are acknowledged to be as high as any place in the world. The Japanese, however, must subsist largely on rice, fish and a few pickles. There can be very little luxuries for even such luxuries as heating.

Plenty of Weeds When thinking of next spring's seed supply, the Farmer's Advocate says it is well to bear in mind that there are already millions of weed seeds slumbering beneath the snow—no need of sowing more.

Jim—"You'll freeze stiff standing here waiting for your girl."

Joe—"Well, I want to make myself solid with her."

Nothing angers a woman more than a man who refuses to lose his temper.

An informal poll of the British House of Commons by Sir William Bull is said to show that an overwhelming majority of the members favor the many-times-suggested English Channel tunnel.

An even more fascinating proposal than the 60-year-old project for the tunnel, also now under discussion in England, is a 21-mile channel bridge. From it travellers who have suffered the tortures of channel sea-sickness could laugh at the churning waters that caused them misery.

A channel bridge scheme was outlined 40 years ago. Competent engineers claim such a structure feasible.

But British military strategists, arguing for national security, have violently opposed the bridge project as well as the more practical tunnel through all the decades of discussions.

The question to be decided is whether the great war altered England's isolation as a tight little island. Those who favor the tunnel say Britain is directly open to attack from the air and to siege by submarine. If they can convince the military strategists of this, the tunnel project will at last enter the field of practical politics.

Political rather than engineering difficulties always have blocked the channel tunnel.

A channel tunnel, by cutting out the steamer, would save an hour and a half on the trip from London to Paris.

France never has opposed the project, for with traditional enemies just across long frontiers, an undersea tube which could easily be shelled or even destroyed in case of war, presents no terrors.

Commercial companies exist both in England and in France to carry out the tunnel scheme, the cost of which is estimated at \$150,000,000.

Proved Good Neighbors

Iowa Farmers Cleared Blocked Roads to Let Doctor Through

Critically ill with influenza, Harvey Northey, residing on a farm outside of a small settlement in the state of Iowa, was unable to reach a doctor. Five miles away a physician stood ready to go to the stricken man's bedside, but was separated from him by snowbanks 12 feet high. This was the information conveyed by telephone to one of Northey's neighbors.

In short order 11 other neighbors gathered together with tractors, snowplows and hand shovels and dug an opening in the snow for the doctor to get through. These men, facing a 60-mile wind, cut through five miles of road and removed hundreds of tons of snow. The doctor was able to administer treatment that has placed Northey on the road to recovery.

Deeds such as this may not be preserved for posterity as are heroic deeds on the battlefield, bravery at sea, or triumphs of the air. But they are in every sense of the word heroes of the first water.

Made a Difference

Lady—"What a noise those neighbors make. Listen to the children howling."

Maid—"But that noise comes from your own nursery."

Lady—"Really? The little darlings must be enjoying themselves."

Chris—"Marriage acts like a brake on a man."

Bliss—"Sure does! It broke me!"

There will never be a decrease in the price of mistakes even though they are made in larger numbers!

At least two-fifths of England's diet consists of bread.

JOLLY TARS IN HORNPIPE ROLL

Only they are tar-esses, as it were, and these pretty maidens gave a massed hornpipe, as shown above, at Vancouver's first Sea Music Festival held January 23-26 at the Hotel Vancouver in that city under the auspices of the Canadian Pacific Railway. Miss Mary Isedale (centre) presented the dance and also arranged others for the festival.

"Ah, when he died he was such a beautiful yellow."

"Did your husband die of jaundice, then?"

"Not my husband—the canary!"—Pages Gales, Yverdon.

Safety Device For Miners

Copper Diggers in Mexico Wear Steel Head Protection

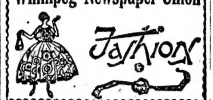

A United States Bureau of mines engineer reports, following a recent visit to one of the big Mexican copper diggings, that the latter concern permitted no one, miner, manager or visitor, to go underground unless he wore a steel head protection. The company furnishes the helmets to the men at 50 cents each and replaces all damaged ones free of cost. On one occasion a hunk of ore weighing 87 pounds fell through the top lagging, a distance of four feet, and struck a miner squarely on top of the head. The steel hat was badly dented, but the man was unharmed, save for a slightly sprained neck. The company has an exhibition at the mine head a collection of several hats, all badly dented, that represent each a miner's life saved.

Sale For Worthless Horses

Montana Packing Plant Will Require Seventy Head Daily

Surplus range ponies which now are more or less worthless, may find a market at the horse meat packing plant just opened in Grand Falls, Montana. Southern Alberta has hundreds of nondescript range horses roaming the prairies, eating up valuable grass and the Great Falls plant may be in a position soon to buy many of these animals for it will require 70 head daily. The output will be shipped to Continental Europe where horse meat is a staple commodity.

Saskatchewan Breeders Now 160 At Fairs During Last Year According to a compilation of the Live Stock Review of the Provincial Government Department of Agriculture, live stock breeders of the Province of Saskatchewan won 100 prizes in 1928 at the following fairs: The Royal Winter Fair at Toronto, the International at Chicago, and the annual fairs at Ottawa and Guelph. There were 8 grand championships, 6 trophies, 2 reserve grand championships, 10 senior and junior, 7 reserve senior and junior, 2 Canadian bred and reserve Canadian bred, 31 firsts, 27 seconds, 35 thirds and 34 others. At the Royal, 102 prizes were taken, 24 at the International, 26 at Ottawa and 8 at Guelph.

New Brunswick Settlers

Five Hundred British Families to Be Placed in Province One hundred British families were placed on farms in New Brunswick in 1928 under the assisted settlement plan which completes the quota for that year. The scheme is being continued until 500 families have been located in this province. The farms are provided by the New Brunswick government. Loans up to \$300 are made by the British government and the settlement arrangements are under the supervision of the Dominion government. Repayments extend over 25 years with interest at 5 per cent. per annum.

LONG SLEEP MAKES BABY HAPPY AGAIN

"Our baby kept waking us several times a night, until we started giving him a little Castoria after his last nursing," says a loving mother. "He slept soundly from the first night and it made him look and feel worlds better." Baby specialists endorse Fletcher's Castoria, and millions of mothers know how this purely vegetable, harmless preparation helps babies and children, with colic, constipation, colds, diarrhoea, etc. The Fletcher signature is always on the wrapper of genuine Castoria. Avoid imitations.

Vancouver Port Improvements The Vancouver Harbor Board is understood to be seeking federal permission for having a construction program involving \$5,000,000 of port improvement. The proposed works include a deep sea pier, the first unit of a cold storage plant, a coastwise pier and extensive additions to the present grain storage capacity of the port.

Mendicancy De Luxe

Young Englishman Stimulating Palsy Collected Large Sum Daily

In the opinion of G. K. Chesterton, complete social equality in England will not be achieved until a coster-monger may wear a monocle without exciting remark. It is interesting to have his comment on the discovery by the police of a professional beggar with a valet. A young man, only 23, he was busily engaged in putting Mr. Ford's doctrine into practice and spending his easy earnings in ways which he thought to his own advantage when the authorities evinced an acute curiosity concerning the source and extent of his finances. A country house, with completely equipped billiard room, is another of his luxuries. His income, produced by stimulating palsy, has amounted to as much as \$100 in a day. Subway travelers, observing his pathetic figure, have been deeply touched—for sums from 10 cents upward. The interruption of this enterprising mendicant's activities, just at the threshold of the prosperous holiday season, must have been especially bitter.

CORN'S

Relief in 2 Minutes

Just a drop or two of Putnam's Corn Extractor, and the pain goes away. Relief is almost instantaneous. Removing corns with "Putnam's" is so easy, so sure, so painless—thousands use this wonderful remedy and say it is the best. Don't suffer any longer, use Putnam's Corn Extractor, the one sure relief for corns. Sold at every drug store.

CHILBLAINS

Zam-Buk soon allays the inflammation and swelling, soothes the itching and soothes the maddening irritation. Where skin is broken, Zam-Buk is a valuable base for its great healing and soothing qualities.

Searching For Sunken Island

California Man Starts Fantastic Cruise Because of Dream

A "dream island," sunk in the Pacific ocean off the California coast, is the destination of a fantastic cruise headed by B. M. Bramley, paving contractor, who has bought the steam yacht Peary from Donald R. MacMillan, explorer, for the expedition.

Bramley's Island lies under 20 feet of water, where it was first revealed to him in a dream while in Cleveland. So vivid was his dream and so having was the prospect of 20th century exploration and discovery in sea and for centuries by ships of every nation that Bramley set out in search of his island while in California.

A ship was chartered and he made soundings for days without success. He gave up the idea and was about to return when persistent prompts to find his "dream island" led him to charter an aeroplane for further search. He found it, plainly visible from the cockpit, he said, in 15 or 20 feet of water.

Now he means to build a breakwater about the place, pump sand from the bottom of the sea to make new land, and erect thereon a fishing and outing paradise.

How Best to Use Vicks VapoRub After the Flu

Late Winter Colds Are Doubly Dangerous This Year; Don't Let Them Get a Start

AVOID PNEUMONIA OR A SECOND ATTACK OF FLU

If you catch a fresh cold, don't keep it overnight. If possible, go home and go to bed. Take a laxative and a hot lemonade, apply hot wet towels over throat and chest until the cold is thoroughly removed. Then rub vigorously with Vicks Spread on thickly and cover with warm flannel.

Leave the bed-covering loose, so that the vapors, released by the body-heat, may be freely inhaled. At home and go to bed. Take a laxative and a hot lemonade, apply hot wet towels over throat and chest until the cold is thoroughly removed. Then rub vigorously with Vicks Spread on thickly and cover with warm flannel.

Repeat this treatment every four hours, eat lightly, and stay in bed until the cold is broken. Complete rest helps the body throw off the cold more quickly.

Mother, especially appreciate Vicks for the children. As it is applied externally, it can be used freely and often, without upsetting delicate digestion, as too much "dosage" is so apt to do.

Skipping Motor Age

China Is Now Turning Her Attention to Aviation

China, if the signs are read aright, is about to "jump" the automobile age and pass direct from the bullock cart and railroad to the aeroplane and all that it embraces. This is not to say that motor car manufacturers will not find a lucrative field in the 18 provinces which comprise China proper, for the automobile is making inroads there; but it is almost certain that before the motor vehicle has become to the east what it has become to the west, aviation will have found acceptance as a common means of conveyance.

Miller's Worm Powders will eradicate the worm evil that bores so heavily on children and is believed to cause many fatalities. They are an acceptable medicine to children and can be fully relied upon to clear the food channels thoroughly of these destructive parasites and restore the inflamed and painful surfaces to healthfulness. They are an excellent remedy for these evils.

An Eastern Saying

He who knows not, and knows not that he knows not, is a fool—shun him;

He who knows not, and knows that he knows not, is ignorant—teach him;

He who knows, and knows not that he knows, he is asleep—awake him;

He who knows, and knows that he knows, he is wise—follow him.

The longest telephone call in the British empire is now from London to Vancouver, a distance of 7,000 miles. The charge is about \$15 a minute.

SUNDAY SCHOOL LESSON FEBRUARY 10

REPENTANCE AND FAITH

Golden text: Repent ye, and believe in the gospel. Mark 1:15.

Lesson: Isaiah 1:10-20; Ezekiel 18:20-23, 27-32; Mark 2:1-12; Luke 3:1-14; 15:11-24; Acts 2:32-39; Hebrews 11:1-10.

Devotional reading: Psalm 27:1-5.

Explanations and Comments

Jesus Is Sovereign and Messiah, Acts 2:14-36—Peter is speaking to Jews, and his first object is to prove that Jesus fulfilled Old Testament prophecies and expectations in regard to the Messiah, hence he tells them (verses 15-21) that the events of Pentecost which had so amazed them are but the fulfillment of Joel's prophecy (Joel 2:28-32), that at the coming of the Messiah God's Spirit would be poured forth, and old and young, men and women, bond and free, would see visions and speak divine truths.

Then Peter takes up his great theme that Jesus is the Christ, and gives three proofs. First, there are the miracles which his hearers had themselves witnessed. Second, there is the resurrection, of which they are all witnesses: God had raised Jesus from the dead to higher life and wider power. Third, there is the pouring forth of the Holy Spirit in Pentecost, which they have seen and heard: Jesus still lives and cares for His followers, for it is He who has sent the Spirit. Furthermore, the resurrection and exaltation fulfill a prophecy of David, as given in Psalm 110:1.

The Lord said unto my Lord, sit thou on my right hand, Till I make thine enemies the footstool of thy feet.

Two different Hebrew words for Lord are used in the first line, and the meaning is, Jehovah said unto the Messiah, David could not have been speaking of himself, for David did not ascend into the heavens. "Sit thou on my right hand" means, by partaker of the divine glory and dominion. "Till I make thine enemies the footstool of thy feet" is an expression denoting complete victory, which originated, no doubt, from the ancient custom of conquerors putting their feet on their enemies' necks.

Then comes the climax of Peter's sermon: "Let all the household of Israel therefore know assuredly that God hath made him both Lord and Christ, this Jesus whom ye crucified."

A Real Literary Find

The New York Times says that one of the greatest rarities in United States literature, a first edition of Edgar Allan Poe's "The Murders of the Rue Morgue" has been found in a pile of old books which a command dealer bought for a trifle.

Before news of the discovery became public, however, the volume was bought for \$25,000 by a New York book collector.

"Are there any questions?" "Yes, sir. How do you calculate the horse-power in a donkey engine?"

China, if the signs are read aright, is about to "jump" the automobile age and pass direct from the bullock cart and railroad to the aeroplane and all that it embraces. This is not to say that motor car manufacturers will not find a lucrative field in the 18 provinces which comprise China proper, for the automobile is making inroads there; but it is almost certain that before the motor vehicle has become to the east what it has become to the west, aviation will have found acceptance as a common means of conveyance.

Para-Sani

YOU'LL FIND A hundred vital, saving uses for Para-Sani Heavy Waxed Paper in your home. Comes in handy, sanitary, knife-edged packages. For less exacting uses: "Centre Pull" Waxed Tissue (flat sheets). At grocers, druggists, stationers.

So Many Home Uses!

Last Word In Cruisers

Germany's Latest Ship Makes Product of Other Countries Obsolete

According to the description which Hector C. Bywater, the Baltimore Sun's special correspondent gives, the new German armored cruiser Ersatz Tromper is a triumph of concentrated power. Keeping within the narrow limit of 10,000 tons for armored ships imposed upon her by the treaty of Versailles, Germany has constructed a ship which has the fighting effectiveness of a dreadnought, the speed of a cruiser and the hitherto unheard-of cruising radius of 10,000 miles. In addition, the new cruiser has other novel features which add immensely to its strength, and altogether it represents a production that tends to make the latest ships of other countries immediately obsolete.

NO MEDICINE LIKE BABY'S OWN TABLETS

For Either the Newborn Babe or the Growing Child

There is no other medicine to equal Baby's Own Tablets for little ones—whether it be for the newborn babe or the growing child. The Tablets always do good. They are absolutely free from opiates or other harmful drugs and the mother can always feel safe in using them.

Concerning the Tablets, Mrs. John Armour, R.R. 1, South Monaghan, Pa., says: "We have three fine healthy children, to whom, when a medicine is needed, we have given only Baby's Own Tablets. The Tablets are the best medicine you can keep in any home where there are young children."

Baby's Own Tablets are a mild but thorough laxative which regulate the stomach and bowels; banish constipation and indigestion; break up colds and simple fever and make teething easy. They are sold by medicine dealers or direct by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Alberta's Farm Wealth

The Calgary Herald says that in 1900 the Province of Alberta had a farm wealth which was estimated at \$50,000,000, while in 1927 it had jumped to \$338,161,458. And while it produced about 6,000,000 bushels of wheat in the former year, in the latter it yielded 162,000,000 bushels. We wonder what 1947 will show!

Chemists are now trying to make artificial cotton from wood fibre.

FOR SALE—Fully equipped farm of seven quarter sections in the Leader district. \$5,000.00 will handle; balance half crop payments. Owner retiring. Apply to S. W. Keston, Leader, Sask.

ADVANCE IN HAIL INSURANCE RATES FOR WEST

Montreal.—Substantial increases in hail insurance rates in Alberta and parts of Saskatchewan were decided upon at the annual meeting here of the Canadian Hail Underwriters' Association. Details of the increases remain to be worked out at a further meeting, but it was understood that for most of the province of Alberta the increase in rates will be confined largely to the extreme south, although not to all parts of that district. The increase there would be five per cent.

Reductions will be put in force in many parts of central and northern Saskatchewan. Manitoba is not affected.

This information was given to the Canadian Press by John Wilcox, president of the organization for the coming year. Mr. Wilcox said the association was not basing its new costs upon the excessive damage through hail during the past two years but was taking an average for the last 15 or 16 years' operations.

Forty-two delegates representing hail insurance companies in Canada, with some members from Chicago and New York, attended the meeting. The decision to raise rates followed study of a report of a committee of experts who found that over a period of 15 years losses have been so heavy that hail underwriting has been far from profitable.

Accorded Privileges Of Press Gallery

Each Dominion Now Has Press Representative in British House

London.—As a means of facilitating the despatch of British parliamentary news to Canada and the other dominions, the principal dominion press representatives in London have now been accorded the privileges of the press gallery at Westminster, similar to those accorded writers for the London papers.

Previously there was only one press gallery ticket for all the dominions together. Each principal dominion representative now receives an individual ticket. It is understood that Hon. L. C. M. S. Amery, secretary for the dominions, personally had a hand in securing this improvement.

Abandons Visit to Europe

Bombay, India.—Mahatma Gandhi, Nationalist leader, who hopes to achieve home rule for India within a year, has abandoned his idea for a visit to Europe this year. Writing in the current issue of the newspaper "Young India," he says: "I do not think of next year. A Canadian friend writes to tell me I could usefully go to Europe only as a representative of a free India. I felt the truth of this remark."

Has Remarkable Record

Winnipeg.—John McDougall, veteran sergeant-at-arms of the Manitoba legislature, is in indifferent health at present, and for a second time in half a century may not be well enough to attend the opening of the house on February 11. Last year he was ill too, and it was the first time in 50 years that he was unable to carry the mace on an opening occasion.

World's Largest Theatre Sold

New York.—The Hippodrome, the world's largest theatre, has been sold for approximately \$9,000,000. Although the purchaser, Frederick Brown, a real estate operator, was not to disclose his plans, it was indicated that he had a new project in mind for the site, and that the theatre might be razed.

Villagers Assist Fisherman

Petoscany, Mich.—The entire male population of Cross village, breaching a path through towering snow drifts reached a hospital here bearing Lewis Street, 51-year-old fisherman, who reached mainland after a week's battle with jagged ice floes in Lake Michigan.

Will Not Interfere

London.—Sir Austen Chamberlain, British foreign secretary, told the House of Commons that the British government has no intention of assisting any of the factions contending for power in Afghanistan. He added that it would not interfere in the internal affairs of that country.

W. N. U. 1771

Aid For Civil Aviation

Flying Clubs Will Be Given Thirty-two New Planes This Year

Ottawa.—Thirty-two aeroplanes will this year be given flying clubs by the government. It is estimated by flying officials in the national defence department.

Besides issuing two machines to each newly-formed organization, one extra machine is given for each one which the club members purchase themselves. The 16 clubs already in operation are each expected to buy a machine this year.

There are over 150 flying pilots in Canada with seven years' experience in the air, according to figures compiled by the national defence department in connection with applications now being received by the civil service commission for two positions as inspectors of civil aviation.

There is one vacancy at Ottawa and one at Regina. These are additions to the staff stationed by the development of aviation. At present there are three inspectors. Their duties include the examination of prospective pilots, testing of machines for airworthiness and choice of locations for airfields.

Doukhobors Found Guilty

Ringleaders in Clash With Police Receive Jail Sentence

Grand Forks, B.C.—Eight Sons of Freedom, Doukhobor religious fanatics, were sentenced to serve six months each for obstructing police officers. They were found guilty by John A. Hutton and John M. Donaldson, justices of the peace. The fanatics offered no defence.

The fanatics were arrested and charged following a clash with 14 provincial police officers and 10 agents who sought to arrest Strepnikoff and Welken, wanted for infringement of the School Act. The Sons of Freedom attempted to prevent the arrest of their leaders, but were overcome by tear gas bombs.

Peter Veregin, Doukhobor community head, reported to have testified in these actions, was engaged in a marketing act trial. He did not figure in the case.

Coast Wants Orient Trade

Would Gain Larger Share for Canada, Says T. S. Dixon

Ottawa.—Canadian boards of trade from the Atlantic to the Pacific are interlocked in such a way as to assure immense benefits for national commerce and fruitful results from their co-operative labor, said T. S. Dixon, president of the Vancouver Board of Trade in an address at the 72nd annual meeting of the Ottawa Board of Trade.

Within the next two years, Mr. Dixon declared, Vancouver would lead an expedition of Canadian business men into the Orient in an attempt to further increase the prestige of the Dominion in the Far East and gain a larger share of Oriental trade for the manufacturers and producers of Canada.

Submits Request To League

China Wants to Protect Her People Against Opium Evil

Geneva.—The opium evil was made the occasion for another plea by China for the right to police its own territory irrespective of the nationality of offenders.

Wang King-Ky, chief representative of his country at Geneva, submitted that it was impossible to separate the narcotic and political questions so long as China was not free to protect her own people against the acts of nationals of other powers.

Plans Branch Line in B.C.

Nelson, B.C.—Notification to the public of its intention to apply at the coming session of parliament for charter rights to build a railroad link from Kootenay Landing to Proctor, B.C., is announced by the Canadian Pacific Railway in a statutory notice. The notice issued from Montreal under date of January 20, is signed by E. Alexander, secretary.

Carpenter Electrocutted

Winnipeg.—William Jardine, 23, a carpenter, was electrocuted at the substitution of the Winnipeg Electric Company near Selkirk, Man., when his saw came in contact with a high tension wire.

Would Try New Stunt

Detroit, Mich.—Gene Lauissier, who dropped over Niagara Falls in a rubber ball July 1 says he will jump off a new 46-story building here for \$25,000, with a pair of wings of his own design.

Plan Being Endorsed

National Day of Thanksgiving for Recovery of King Is Urged

Vancouver.—A movement emanating in the province of Quebec to hold a national day of thanksgiving throughout Canada for the recovery of his Majesty King George from his recent illness, and which it was stated has the endorsement of Premier Taschereau of Quebec and other prominent men of that province, was wholeheartedly supported by Mayor W. H. Malkin and the Vancouver city council.

Winnipeg.—Endorsement of the plan to hold a Dominion-wide day of thanksgiving for the recent recovery to health of His Majesty King George was given by Mayor Dan McLean of Winnipeg.

Studying Aircraft Device

Dominion Government May Establish Direction Finding Apparatus Service

Ottawa.—For the purpose of ascertaining what the United States is doing in the field of direction finding for aircraft by radio, Maj. W. Arthur Steel, one of the senior officers of the signals service, department of national defence, has gone to Washington, New York, and other points, to obtain information for Canada. Direction finding apparatus has been used to advantage in the operation of aircraft in several countries and the Canadian government is considering establishing such a service in the Dominion.

RIVALRY SEEN BETWEEN ITALY AND FRANCE

Toronto.—The Mail and Empire publishes the following special cable from Paris:

"A factor in the world naval situation which hitherto has been obscured by Anglo-American discussion of the limitation of naval armaments is the growing rivalry between France and Italy in the Mediterranean, as reflected in their building programs. For the first time much prominence is being given to this subject here and it may fairly be suspected that the British 'big navy' party is preparing to counter any suggestions for a naval holiday with the United States by pointing to the danger to British interests in European waters as necessitating more cruiser building.

Hector J. Dwyer, well known naval expert in a column article in the Daily Telegraph analyzes in startling terms the French-Italian building race and speaks of the Mediterranean as "one of the main arteries of our empire."

"No neutral can hope to conduct business as usual in a zone of active warfare," he finds proceeding to pile up statistics intended to prove his contention. "That France and Italy are now in open rivalry for strategic control of the Mediterranean is the only possible inference to be drawn from recent developments."

CANADIAN IDEAS IN JAPAN

When K. Hashima, superintendent of rolling stock and machinery of the Sapporo district, Japanese Government Railways, was in Canada recently studying the operations of the Canadian National Railways for the benefit of the people of his own country, he was particularly interested in the methods used in clearing snow from the track. In a letter to W. A. Kingsland, general manager of the National system's western region, Mr. Hashima expressed his thanks for the co-operation given him by A. H. Eager, general

superintendent, motive power and car equipment, Winnipeg, and A. McCowan, assistant general superintendent, car equipment. He went on to describe a new type of snow-fighting machine which he had devised from ideas given him by K. D. McLeay, bridge and building master of the Canadian National Railways, Calgary division. The machine, which is the most successful of all the types tried on the Japanese railways, has been named McLeay. The plan is seen here in action and is a photograph of Mr. McLeay.

SAYS CANADA TOO KEEN

Senator Walsh of Massachusetts is waging a campaign in congress to show the United States the amount of trade which Canada is winning from the republic. He expressed the opinion that Canada was too keen and is rapidly outstripping the United States.

Figures Show Slight Increase

Twelve Per Cent. Advance in Immigration to Canada Last Year

Ottawa.—Immigration to Canada continues to show a moderate increase over that of a year ago, the total for nine months of the fiscal year up to and including December being 144,113 compared with 128,928 for the same period in 1927. The increase is 12 per cent.

The total immigration of December amounted to 5,515 compared with 4,566 in December, 1927, an increase of 21 per cent. The month's immigration included 1,476 British, 1,541 from United States, 24 Belgians, 50 Danish, 90 Dutch, 204 Finns, 31 French, 454 Germans, 44 Norwegians, 75 Swedish, 15 Swiss and 1,499 of other races.

Of the 144,113 immigrants who came to Canada in the last nine months \$2,257 were of the farming class and 14,199 were female domestic servants.

London Awaits News

Announcement of Duke of Gloucester's Engagement Expected Shortly

London.—The Daily News said it understands that the engagement of the Duke of Gloucester, formerly Prince Henry, third son of King George, would be announced shortly.

The newspaper said it was believed the duke was engaged to Lady Angela Scott, daughter of the Duke and Duchess of Buccleuch.

The Daily News understood that the announcement had been delayed because of King George's illness.

Appointed Vice President

Winnipeg.—R. S. Law, formerly of Clarendon, Alta., has been appointed to the board of directors and to the position of first vice president of the United Grain Growers, Ltd., it was announced here by Hon. T. A. Crerar, president of the company.

Mr. Law succeeds C. Rice-Jones, who held the position for the past 11 years and who resigned to enter business in his own right.

Spectators Thrilled By Parachute Jump

Two Winnipeg Airmen Brave Wind and Below Zero Weather

Winnipeg.—Braving a high north-west wind and 15 below zero weather, Flight Lieut. A. Carter and Sergt. Joe Maskell, of the Royal Canadian Air Force, thrilled 300 persons at Stevenson Aerodrome by jumping from aeroplanes with parachutes at a height of 2,500 feet.

The feat is unique in Manitoba and perhaps in Canada, considering the weather conditions. Carter landed in a clump of trees two miles east of the point where he jumped, and a group of airmen had to rescue the parachute from the branches. Maskell also was carried far afield.

Carter's jump was the 36th of his career. He holds the record for parachute jumpers in the British Empire, having made a leap of 20,000 feet at High River, Alberta, in November, 1925.

Secures Desired Land

Veteran of C.E.F. in Siberia Files on Peace River Homestead

Peace River.—After waiting from Friday, January 18 until Monday morning, January 28, G. Turcotte, Falher, was successful in securing the land of his choice, a homestead in the Falher district that had been under lease but recently was thrown open for filing. Ten days of terrible sub zero weather with the thermometer ranging from 30 below during the day and down to almost 50 during the long nights he endured.

Turcotte did not have it all his own way for Corporal McDonald of the mounted police was on hand to prevent disorder. He ordered Turcotte to remove his hand from the door knob so that the door could be opened. Another man named Trudeaut was on hand and secured it while the door was opening, but Turcotte was in the most favorable position and squeezed in first.

Parley On Import Preference Likely

But Reports Presented by President Coolidge Not Yet Received

Ottawa.—At the department of external affairs, it was stated that the reports presented by President Coolidge to congress on the subject of customs preferences on imports through Canadian ports have not yet been received. No diplomatic representations based on them have yet been made. The United States minister in Ottawa, however, brought the general situation to the attention of Premier Mackenzie King some weeks ago.

As President Coolidge informed the United States senate that diplomatic negotiations would begin with Canada on the matter, it is anticipated that there will be representations in the near future.

TRAFFIC VIA CANADA'S PORTS NORMAL FACTOR

Washington.—Discriminatory tariffs against goods imported into the United States via Canadian ports is recommended by only one out of three government departments which reported to the senate on the diversion of United States commerce to Canadian ports. The other two found that the movement of United States imports and exports through their neighbor's ports was caused chiefly by the normal factors of international trade and transportation and nothing much could be done about it except to discuss with Canada through diplomatic channels the possibility of putting United States ports on an equal basis with Canadian ports on imports into Canada.

The majority report which remarks at the outset that Canadians are just as much concerned over the movement of Canadian export grain through United States ports as we are made by the departments of state and agriculture and the Interstate Commerce Commission. It was unanimous.

The minority report was made by the United States shipping board which operates at a deficit the shipping acquired by the United States government during the war. The tone of the two reports is sharply contrasted. The majority quotes statistics to show that 27 per cent. of all Canada's exports travel through United States ports while only five per cent. of United States exports travel through Canadian ports.

CANADA STILL RETAINS HIGH TRADE POSITION

Ottawa.—Canada's position among the leading commercial nations of the world in international trade continues to rank very high. Worldwide statistics are not yet available for the calendar year 1928, but for the calendar year 1927, Canada occupied fifth position in import and export trade; second position in exports and total trade per capita, third position in favorable trade balance, and first position in favorable trade balance per capita.

Inasmuch as Canada's total trade for 1928 shows an increase of \$270,545,000, imports \$135,500,000 and exports \$135,045,000, her position in international trade in 1928 was well maintained.

During the calendar year 1928 Canada's total trade amounted to \$2,596,448,000, compared with a similar trade of \$2,325,000,000 for the same period in 1927, the increase, 1928 over 1927 amounting to \$270,545,000 or 11.6 per cent. This increase was greater than Canada's total 30 years ago.

The outstanding feature in Canadian trade in 1928 was the enormous increase in her wheat exports. For the calendar year 1928 total exports of wheat reached 555,425,541 bushels, valued at \$453,767,578, the largest 12 months' period on record. The increase in 1928 over the previous largest wheat export was quantity 17,270,000 bushels, value \$132,110,891.

During the year ended December 31, 1928, the duty collected on imports amounted to \$192,566,000 as compared with \$168,303,000 for the same period in 1927. The duty collected for 1928 exceeded that collected for any calendar year period, except for the year 1920, when it amounted to \$203,029,000.

Manitoba House To Open February 11

Will Proceed to Take Up Business Without Usual Adjournment

Winnipeg.—The Manitoba legislature will go into session Monday afternoon, February 11, at 3 o'clock. An order-in-council during the day was signed by Hon. J. D. McGregor, shortly after being sworn in as lieutenant-governor.

The house will proceed with the business before it immediately after the formal opening ceremony and the reading of the speech from the throne by the new lieutenant-governor. This marks a departure from custom previously followed.

Will Not Compete

Toronto, Ont.—The ladies' high jump which was on the program of the Melrose games at New York, February 9, has been cancelled, according to a wire received by Miss Myrtle Cook. The wire said exhibitions were not permitted at these games and that Miss Ethel Catherwood has been notified to this effect. This means that Miss Catherwood will not compete in New York.

Praises Prince for Visit

West Hartlepool, Eng.—The visit of the Prince of Wales to the coal fields was praised by Labor Leader Clynes at a meeting here. "I think there is a fine human touch in that act and nothing has brought the throne nearer to the trouble of the poor than this unprecedented act by perhaps the most popular figure in the world."

May Send Minister to States

Washington.—Negotiations for the exchange of diplomatic representatives between the United States and the Union of South Africa, were said, at State Department, to be under way. South Africa would be the third entity of the British Commonwealth to appoint a minister to Washington. Canada and the Irish Free State are the other two.

Appropriation for Highway

Washington.—The house foreign affairs committee approved a resolution authorizing the appropriation of \$50,000 to permit the United States to co-operate with Latin-American nations in the building of a Pan-American highway. The highway would extend from Canada to Cape Horn.

Unemployed in Germany

Berlin.—The official number of unemployed persons in Germany has increased to 2,200,000. Unofficial estimates placed the number at 2,500,000.

The Short Line To Europe

Hudson Bay Route to Liverpool Means Great Saving

Far north in Canada a new rail road is taking form rapidly, and within a year the Hudson Bay Railway will be in operation from The Pas, Manitoba, to Fort Churchill, on Hudson Bay. The Pas is nearly 500 miles from Winnipeg by rail, and the extension to the west shore of Hudson Bay is nearly as much farther.

Through the Hudson Bay and eastward through Hudson Strait, skirting Labrador and passing south of Greenland, lies the short water route to Liverpool, a distance from Fort Churchill of approximately 2,000 miles. Following in a general way the 60th parallel of latitude east, the route is shorter even than the distance between Atlantic coast cities and Liverpool, and grainsheds receiving the products of the farms of western Canada after a relatively short rail haul will have a shorter trip than those operating from Montreal, New York, Baltimore and the other important points of transshipment.

As a result of observations from vessels and airplanes, engineers incline to the belief that the Hudson Strait is blocked by ice less than eight months in the year and that in the early fall, when the grain begins to move, ships may operate safely from the railroad at Fort Churchill through the northern passage—a route which all the early explorers believed existed and which many sought unsuccessfully—to Europe, eliminating many hundreds of miles of rail, lake and rail movement of the grain.

As the Hudson Bay Railway takes shape, the advocates of a line through the Peace River country, 1,400 miles to the westward, take hope in the prospect of a new line reaching across an even more northerly section of the Dominion than the Canadian National's present line, connecting on one end with the Hudson Bay route and on the other with the Peace River country, and thence to the Pacific through a connection with the present Prince Rupert line. Adequate transportation will open up more of Canada's enormous wealth.

Anxious To File Homestead

Man Held First Place in Line During Bitter Weather

Walking or running back and forth the width of the land offered at Peace River in order to fight the bitter cold of 45 below, and relieved by his partner, a prospective homesteader for several days and nights kept his position secure as first in line for his choice of land which was thrown open for entry at the end of January. The days became steadily colder after he took up his position. Courage and fortitude to go home were suffered uncomplainingly but for all that a terrible price to pay for a homestead.

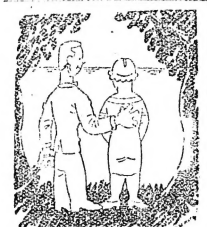

Advice to Dairyman

W. T. Hunter, superintendent of the Dominion Experimental Farm at Summerland, is urging the dairyman to procure the best high grade dairy stock, because prices are about to make a big advance, he says, and the Okanagan Valley is one part of Canada where butter-fat can be produced very cheaply.

Wife—"Don't you think I have put too much salt in the soup, dear?" Model Husband—"Not at all, darling, there is, perhaps, a little too little soup for the salt, that is all."

Broad leaf wood is carbonized for acetate acid and wood naphtha and coniferous wood for turpentine, oil and tar.

You can't pay tuition in the school of experience!

"Yes, Miss Rose, it is a fact that the son of a genius is nearly always a fool."
"Was your father a genius?"
"Der Broomer Becht."

W. N. U. 1771

The Red Cross Rendezvous

Valued Services Rendered by Society at Albert U. F. A. Convention

January sees the yearly pilgrimage of the hundreds of Albertan farmers to the great four-day powwow in the capital city of Edmonton, the big event of the year known as the U. F. A. convention. Twelve hundred people trekked into the city that week, consisting of delegates, their friends and hundreds of interested visitors. Six extra C.P.R. cars of sleepers ran between the two cities, Calgary and Edmonton, for the trek from the south required the comfort of these modern "covered wagons," where a man can put himself and wife and family to bed in snowy blankets and enjoy warmth and good food and an electric light by which to read his paper.

For the pilgrims were not men alone—although the majority represented the sterner sex. With them were the womenfolk, westerners all, registering in their eyes a hint of wide horizons in far flung prairies—or the silence that is found in solitary places—looking at women look who seek for things far off, and have an inexhaustible faith, an unquenchable hope, and a charity that beareth all things.

Some little ones, too, were seen in the gathering, bundled up morsels of humanity as they trudged out of autos and trains.

This explains the specialized service of the Alberta division of the Red Cross which made the strenuous days pleasant and easy.

Right at the top of the great red brick church, far removed from the busy platforms where a lieutenant-navigator and a premier and many mighty men of valour declaimed daily before the microphone, might be found the cradle of the fledglings—the children's nursery and Red Cross rest room.

A haven of refuge this, with snowy coats for tired little feet, too tired to toddle any more, roomy rockers where many a mother reclined when the heat of the argument, downers and the steam-heated atmosphere drove her to take a siesta with the children. A Peter Pan playroom for the four-year-olds, and a tiny tea table with real tea things at which presided Miss Seven-Past at the Mad Hatters' tea party completed a charming toupesale.

Such was the much valued service rendered by Red Cross at the annual United Farmers of Alberta convention, when hundreds of farm men and women touched city life in close contact in an adventure of education and entertainment.

"Meet me at the Red Cross" became the call of busy fathers and mothers who wandered their several ways to lecture hall or committee rooms. Safely parked for hours, the children were sheltered under the well known flag bedecking the walls of that upper room with its peace-time message "Still serving."

Said one anxious looking individual with his arms full of mother's shopping plus an obstreperous infant, "Red Cross still serving! Thank goodness for that."

Cannot Be Standardized

Efficiency in Every Line Confined to the Few

"It very often follows that the man who keeps scrub stock is a scrub farmer." That sentence in a discussion of livestock breeding catches the eye of the editor of the Chicago Drovers' Journal, who remarks that it is not a new thought, and that we all know there is much truth in it. The only value he observes in it is that it may stir some fellow, whose stock looks pretty hard, to try to do better. Some folks say there is no place for scrub stock, and can't understand why any of it is produced in a civilized country. But we never will be rid of it. There will always be scrub stock, and scrub farmers, and scrub doctors and lawyers and, yes, even newspaper men! Efficiency never can be standardized. Always some will do better than others.

Gold in Alaska

Alaska can still point to its mountains and say that is gold in them their hills. In 1928 its miners extracted \$6,775,000 worth as against \$5,927,000 for 1927. Prospecting still goes on, but no new find of considerable moment was reported last year. Every year sees a few placer mining fields worked out, but Alaska never troubles itself about that, always feeling sure new ones will be discovered. Experience has given fair warrant for the optimism.

Registered in error as "Alice" instead of "Ellis," 43 years ago, a Leeds, England, business man has just discovered that officially he is a "woman."

Studying Interior Of Earth

Much Will Be Learned In Future Is Belief

Not even the most visionary of natural scientists would venture to forecast that a system of antipodal tunnels would be a part of the transportation scheme of the future, nor that greater knowledge of the middle of the earth will be gained by burrowing a few thousand miles into it. But that a great deal more than is now known is going to be learned of the innermost interior of this great planet of approximately 8,000 miles in diameter is unquestionable. Prof. Reginald A. Daly of Harvard university says that "the 19th century bequeathed to the 20th an outstanding responsibility—to invent and to use new methods of exploring the earth far beyond the reach of direct penetration by the geologists' eye or by mine and bore-hole."

That important progress will be made in this direction Professor Daly expresses a strong belief. The times earth, he says, "is a gripping subject of research," and through the study of "rays" and "waves" he believes much will be accomplished toward determining the exact character of the earth's center.

West Indies Seek

Aid From Canada

Want Obstacles to Sale of Products in Dominion Overcome

A suggestion that Canada be asked to establish an organization similar to the Empire marketing board or contribute funds to the Empire market board to enable the West Indies and British Guiana to overcome obstacles to sale of their products in the Dominion was discussed before the first West Indies conference.

Speakers pointed out that new steamship services between Canada and the West Indies must increase trade between the Dominion and the colonies, necessitating action to facilitate the exchange of goods.

Advance in Aviation

There are 55 commercial aviation companies in Canada, according to a report of the Department of National Defence. This is more than twice the number in operation a year ago. There are also 15 private owners and 16 flying clubs. One concern carried 9,647 passengers and 1,192,000 pounds of freight during 1928.

Special Tax for Bachelor

Bachelors more than 20 hereafter must pay the Nish district government in Jugoslavina a special tax for their lives of single blessedness. All adult citizens who are not members of some cultural, educational, charitable or patriotic association must pay an even higher penalty.

Seed Grading Growing in Favor

Minister of Agriculture Gives Report for Past Fiscal Year

The grading of farm and garden seeds is a very important service of the Department of Agriculture at Ottawa. The principle upon which the Seeds Act is based is that of established grade names with provision for grade definitions that are prescribed by regulations. Provision is made within the act for the compulsory grading of nearly all kinds of seeds, and while field roots and garden seeds may be sold under a guarantee of minimum quality yet the grading of these seeds is steadily growing in favor, according to the Hon. Dr. W. R. Motherwell, minister of agriculture, in his report of his department for the past fiscal year. The grading is done on a basis of controlled samples received at the central office of the seed branch at Ottawa and district offices at different points in the country.

As indicative of the volume of work and responsible duties involved in grading agricultural seeds and in checking seed importations, the Hon. Dr. Motherwell points out that there were 5,302 samples received, tested and graded during the year under review. The total amount of seed represented by these samples was, of course, very large, amounting to millions of bushels.

A Word Of Praise

Many Workers Would Rather Have It Than Extra Money

Is there anything so easy to give as a word of praise where it is deserved? Often those who have gone to much extra trouble in doing something special receive no recognition at all. Perhaps they are paid with money. But it is safe to say that many workers would rather have a word of praise from their employers than extra money. Praise not only gives the employee confidence in himself, but acts as a stimulant in his work which he attacks with greater energy than before. A word of praise brings happiness to those who have tried to do their best. Praise is cheap but valued greatly. Be quick to praise.

Sure To Return

Here is the latest story about a plumber. He was just starting off to work when his wife said: "Bob, bring me in some butter when you come back for whatever you're leaving behind."

"Iceland," said the teacher, "is about as large as Slam."
"Iceland," wrote Willie afterwards, "is about as large as a teacher."

Traffic Jams In Air

Private Airplanes Through Route From Paris to London

Traffic jams have followed the airplane into the air. The Le Bourget-Croydon air route, despite the immensity of the heavens, suffers from overcrowding just like the narrow streets of cities.

French and English governments are trying to agree on a means of policing this great skyway. The chief cause of trouble has been private owned airplanes whose pilots for greater safety and commodity preferred to follow the regular route of the big commercial air lines.

These planes have increased in numbers to a point where they are a menace to traffic, especially in hazy weather. When visibility is low, the big London-Paris planes have many narrow escapes from collision.

Some Peculiar Plants

Oriental Countries Have Few With Odd Characteristics

The Egyptian lotus has some peculiar characteristics. For example when growing it can be cut and fed to cattle, yet when ripe it contains a deadly poison.

Then take the Indian plant of which the native name is Madar. The leaf treated and applied like a poultice will cure a severe sprain or bruise, yet the milky juice has an extraordinary effect if swallowed. The sufferer has fits of terrible delirium alternating with bursts of wild merriment and shrieking laughter. This goes on for some hours; then, if the dose has not been severe enough to cause death, the patient falls into a deep sleep from which he wakes up comparatively well.

All Lives Are Interesting

An Article in E. W. Howe's Monthly Says

"If a man is fairly intelligent, he has had experience of interest; if disposed to frankness, his autobiography would be of value. Every man can place colors on the life picture a little differently. I find much more interest in a good autobiography than in any story of polar exploration. There is nothing at the North Pole that concerns any of us; nothing in life that does not."

Alberta Will Adopt Pensions

The province of Alberta will shortly adopt the old-age pensions scheme. This was stated by Hon. Peter Heenan, minister of labor, to a delegation representing the railway brotherhoods which waited upon members of the Dominion cabinet.

Continuity in advertising is as necessary as continuity in breathing.

Revise Map Of Antarctica

Great Change Will Likely Be Result Of Explorations

Sir Herbert Wilkins has been compelled to suspend his exploration program in the Antarctic continent for the present season because of the exceptionally warm summer conditions he has encountered. Because of his inability to locate a new base nearer the Pole, and the soft state of the snow, his projected flight from Deception Island across the continent has been frustrated and must be postponed until a more favorable opportunity. This would have formed a dramatic and spectacular climax to his expedition, but its abandonment does not mean that his venture has failed in its main purpose. For the discoveries already made are of far greater significance as contributions to the world's stock of knowledge regarding the South Polar regions and radically change the prevailing conception of its geography.

The arm of Antarctica that reaches up in the direction of Cape Horn will no longer appear on the revised maps as a continuous projection of the mainland. In reality it is an archipelago of islands. Graham Land, also believed to be an extension of the mainland, has been found to consist of two great islands, the more southerly of them being separated from the continental area by a strait ranging from 40 to 50 miles wide. Just where the border of the true mainland actually lies is still undetermined, but progress of remarkable interest to geographers has been made towards its final location.

Apart from this scientific interest, the identification of these lands as islands has the practical value of pointing out the establishment of points further south than had been previously believed possible. Still more important is the possibility that it may open the way to the location of meteorological stations where observations can be continuously recorded for the purpose of long range forecasting. This is a new element in Antarctic exploration that has not hitherto been taken into account. But Sir Herbert surmises that such meteorological data may disclose a close relationship between cycles of climatic change, originating in the ice-covered plateau of Antarctica, and the great droughts that periodically afflict Australia and other lands south of the Equator.

Discussing these and other possible results of the Wilkins expedition, Dr. Isahak Bowman, director of the American Geographical Society, declares that his work, together with that which Commander Byrd hopes to do, will result in a complete revision of the map of Antarctica. The exploration of a land of continental proportions seems an anachronism in the 20th century. Certainly this is the last generation which can indulge in such an experience.

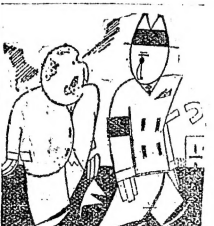

Sodium Sulphate Deposits

The investigation of the natural sodium sulphate deposits in western Canada by the Department of Mines, has proved up tonnages of hydrous sodium and magnesium sulphate in excess of 100,000,000 tons. There are many other deposits in the prairie provinces which could produce sodium sulphate, but while the markets are limited and the price low, only those close to railways can be considered as producers at present.

Reward Wheat Distributed

Two hundred bushels of the "Reward" wheat are being distributed among 100 settlement board settlers in the southern half of Alberta. Each settler is limited to two bushels of this wheat for which a charge of \$3 per bushel will be made. Very satisfactory results have been secured from the quantity of Garnet wheat which was distributed similarly three years ago.

The man who possesses a million is a capital fellow.

"What did your brother die of?"
"A judge in a black cap." Puck Humor, Madrid.

AIRMEN RESCUE TRAPPER

Flying in the face of a northern blizzard two gallant fliers effected the rescue of a lone trapper, found lying in the bush by an Indian, on the shore of Lake Matagami, northern Quebec, his feet frozen and his life in danger by the 50 degrees of cold. Pictures show the two airmen (1) Pilot Clark, who led the rescue; (2) a Fairchild cabin plane which was used; (3) the town of Amos, where the plane landed to place the trapper on board train; and (4) two General Airways planes on the lake shore.

CHAPTER XIII.—Continued.

"Isn't it beautiful?" He indicated with a sweep of his arm the lake, the wooded hills and the glittering glaciers lifting their heads high to the sparkling mountain. He turned to find his companion standing with downcast eyes.

"Don't you like it?" he asked, a trifle resentfully.

Janet raised her head slowly. The limpid depths of the big brown eyes were soft and languorous in the half-light; the full red lips were dewy and tremulous; the peaceful light of the moon shone upon her radiant upturned face, giving it an ethereal glow.

"It is wonderful," she breathed.

Involuntarily he moved closer. What was this inner urge? Love—feeling—emotion, or, it might be, passion?

Laughter and voices came from the trail above. Douglas with several of the visiting party emerged into the white light of the moon. Douglas called his sister's name and Janet and Donald moved up the hill to join them.

CHAPTER XIV

A week before Dominion Day men began applying for leave of absence until the exodus depleted the crew to such an extent that it was deemed advisable to shut down for a week. Donald turned to Gillis as he saw the whole crew of "redshirts" pile tumultuously on the hill.

"How often do the men quit like this?" he asked rather irritably.

"Every holiday," replied Gillis. Donald pondered a moment.

"That means that we may lose a week for Labour Day."

"Very likely."

"Jack, do you think we could keep them here if we held some sort of celebration at the lake?"

"I believe we could," responded Gillis warmly.

"We'll do it then," declared Donald. "We've so many orders that we can run this lay-off may force us to run a night crew."

"Did you spend all your dough, Blackie?" asked Gillis when the "redshirts" arrived back from town.

"Me and Hoopla spent about two hundred bucks, but we had three hundred dollars' worth o' fun. We ain't got enough money to buy a hummingbird a pair o' leggin's, but we sure had a helluva good time, so we ain't worryin'."

"I believe we could," responded Gillis warmly.

"We'll do it then," declared Donald. "We've so many orders that we can run this lay-off may force us to run a night crew."

"Did you spend all your dough, Blackie?" asked Gillis when the "redshirts" arrived back from town.

"I believe we could," responded Gillis warmly.

"We'll do it then," declared Donald. "We've so many orders that we can run this lay-off may force us to run a night crew."

"S'pose you bought them new boots?" inquired Gillis. Blackie forced a laugh. "Goin' to get them next time, Jack," he continued moving closer to his big boss; "say, Jack, you know that I send twenty dollars to my mother back east o'ry month, I—"

"All right, Blackie," said Gillis gently, "I'll advance it to you."

"Thanks, Jack, you're a good pal," commended Blackie in a relieved tone.

Donald and Gillis walked down the hill to inspect the logs in the boom, and as they walked Gillis indulged in some pointed observations. "You know, Donnie, that these loggers are game guys to come back after spendin' all their money and say: 'We had a good time, so we ain't worryin'.' The man ain't human that won't worry after spendin' in a few days the money it's taken him six months to earn swingin' an axe an' draggin' a saw. Still, they hide their remorse under a grin and tell of what a good time they've had. So many people think that loggers spend all their money for booze. Tain't so. That gang of mine give away about half their money to bums around town. I have seen Blackie give away twenty bucks at a time."

As they passed the high-rigger's little cabin, Gillis poked his head through the door. Blackie was absorbed in the task of sewing a patch on a pair of worn boots. A mournful wail blew querulously around the cabin.

"Say, Blackie, do you know what that wind is sayin'?"

Blackie grunted a negative.

"Here's what it's sayin'," said Gillis as he poked his lips: "O-o-o-o-o-o! Where has your summer wages gone! Oh, where has your summer—"

Gillis dodged back as a boot came whizzing past his head.

Misadventure brought an epidemic of labor disturbances throughout the Province. A radical organization seized on a time when work was plentiful and labor scarce to spread their insidious propaganda through the camps. Railroad construction in the interior had been seriously interfered with, and in many cases there had been violence and bloodshed.

Two agitators arrived at the Summit Mill and the next day several of the men—including Hand and Blackie—did not appear when the whistle blew. Gillis found them in Blackie's cabin in a half-drunk condition. That afternoon Renwick ordered the two strangers off the premises and discharged Hand.

Hoopla begged successfully for assistance toward his crying pet. "You know how booze affects Blackie, Jack," he pleaded.

Donald became aware of a changed bearing on the part of many of the men. Sullenness had fallen upon them; discontent manifested itself, as well as insubordination. That afternoon Phillips driven in the logs wrecked havoc with the saws and forced a partial shut-down.

A committee of four men waited on Renwick and presented an ultimatum. They demanded a heavy increase in wages, or they would call for an immediate cessation of work on the part of the men they represented. Renwick promptly refused. In 15 minutes every man in the mill except the clerical staff, the mechanics and the engineer, walked out. In the woods only Gillis' "redshirts" remained at work.

The strikers moved up the track and made camp on a point of land on the lake shore. That night the door of the commissary was pried from its hinges and a quantity of food stolen, and the night watchman put out a fire of incendiary origin.

Renwick, while returning from the power house, was shot at twice from ambush. He wired his resignation to Robert Rennie, and in terrified haste packed his belongings and left

on the next train. An hour later the agent brought Donald a telegram: "Donald McLean, 'Summit Mill."

"You are promoted to position vacated by Renwick. Refuse strikers' demands. Ship at Squamish. Oriental order white plane. Utmost importance. Lumber loaded within week. Use every means in power to keep plant operating."

"Robert Rennie."

He passed the message to Gillis. The big man turned and grasped Donald's hand in congratulation.

"We'll get that order out on time or bust," declared Gillis grimly.

Donald distributed firearms among his loyal men, and one-half the crew patrolled the plant while the others slept.

Donald had been up the greater part of the night, and at Gillis' earnest request he went to his cabin near midnight. As the door closed behind him, Conle, with her rifle resting in the hollow of her arm, rose silently from behind a tree in the darkness of the hillside and flitted noiselessly on moss-covered feet from stump to stump. Unseen she reached the corner of Donald's cabin, where she sank to the ground with the soft, slow grace of a nesting bird.

The Cheakamus Mill, robbed of man-power, was forced to cease operations. At the Summit Mill work went on with such speed as in the situation Donald was able to induce in the men, who were on edge. To him it seemed that they were working on top of a powder mine that might go off at any moment. He discovered in himself a faculty to handle men and to raise them to a fever pitch of enthusiasm—not that the B. C. logger is a hard man to lift to the fighting point. His fight against great odds had gained the sympathy of the loyal—a sympathy and respect that money could not buy. Gillis' gang, with the exception of "Blackie," remained fervently faithful.

Tolling in the hot sun, nearly blinded by sweat, singing lustily, this gallant crew worked their 12 hours without a murmur of complaint. Donald lived on the job, ate on the job, and all day long he drove his men even as he drove himself. His rest consisted of such furtive snatches of sleep as he could steal between his rounds of the night guards.

The first move of the strikers was not of open violence. The haul-back on two of the donkeys broke without apparent reason; one of the big saws had been tampered with; Wilkinson reported two fires of incendiary origin, and also that an attempt to dynamite the power-house had been frustrated.

On the third morning Hand, at the head of a mob of 50 men, made a swift descent on the lumbering operations. It might have been successful if Donald had not expected something of this kind and set efficient watch.

The invaders came down the track in a solid body, armed with cant-logs, handles, pick axes and clubs, and thirsting for battle. At Donald's quick shout of warning his men dropped their tools and came on the run to form in a compact body behind him.

"Don't use your guns unless you have to," he warned, as he noticed several of them flash their revolvers.

Donald climbed quickly to the top of a large stump. In his left hand he held a stick of dynamite with fuse attached; in his right he held a match close to the dangling fuse.

"Men!" he cried in a determined tone, "if you move forward one step I will throw this."

Dairying in Holland

Industry Govers Economic Life, Says Canadian Trade Commissioner

The dairying industry is the backbone of Dutch economic life, writes J. C. Macgillivray, Canadian trade commissioner in Rotterdam, in the Commercial Intelligence Journal. There are 160,000 hands employed in milch cattle breeding alone. In addition to these figures there are the employees of over 900 butter and cheese factories and the persons engaged in the distribution of the yearly production of 3,500,000,000 kilos of milk and its derivations.

Holland is the largest exporter of cheese in the world. The Dutch dairy factories may be classified as co-operative and non-co-operative. Of the former there are 617, divided as follows. Butter factories, 243; butter and cheese, 149, cheese only, 59; milk products only, 17; butter, cheese and milk products, 149. For the non-co-operative factories these figures are, respectively, 17, 45, 4, 57 and 187, making a total of 310.

Recipes for This Week

(By Betty Barclay)

Beef and Pumpkin Left-Over
2 cups left-over beef roast, cubed fine.
2 cups cooked pumpkin.
2 tablespoons sugar.
1 teaspoon salt.
4 small crackers, rolled fine.
1 egg.
1 cup milk.
1 teaspoon cloves.
2 tablespoons butter.

Mix all together and heat. Pour into greased baking dish, dot with butter and brown.

Chicken a la King
1 green pepper, shredded.
1 pound mushrooms.
3 tablespoons butter.
6 tablespoons flour.
2 cups evaporated milk.
2 cups chicken broth.
Salt.
Pepper.

2 cups cold chicken, diced.
1 pintino, shredded.
Cook pepper and mushrooms, if they are raw, slowly in butter 8 minutes. Cover while cooking. Remove mushrooms and pepper from fat, add flour, milk, broth and seasonings. Cook 5 minutes over a low flame, stirring to keep smooth. Add chicken, mushrooms, pintino and pepper and reheat in double boiler to prevent curdling. Yield: 8 servings.

A New Explanation
Policeman—"How do you account for having all these things in your pockets?"

Suspected Person—"Well, you see, officer, we ain't got no sideboard at 'ome."

The chief products of the Cape Verde Islands are coffee, hides, and millet.

400,000 Women Report Benefit by actual record

"Have you received benefit from taking Lydia E. Pinkham's Vegetable Compound?"

A questionnaire enclosed with every bottle of medicine has brought, to date, over 400,000 replies. The overwhelming majority—in fact, ninety-eight out of a hundred—says, "Yes." If this dependable medicine has helped so many women, isn't it reasonable to suppose that it will help you too? Get a bottle from your druggist today.

Amateur Discovers Comet

Find Was Confirmed by Cape Town Union Observatory

An amateur astronomer living at Rosebank, a small community near Cape Town, South Africa, distinguished himself recently by the discovery of a new comet. His "find" was confirmed immediately by officials of the Union Observatory in Cape Town. The comet could not be seen with the naked eye. It travelled slowly, and had no tail. The astronomers of the observatory plan to name it the Forbes comet, after its discoverer, and as encouragement to amateurs.

Canada's Silk Industry

Latest Report Gives Gross Value as About Ten Million

In the past 11 years the silk industry of Canada has increased 55 per cent. in the number of establishments, 251 per cent. in number of employees, 496 per cent. in salaries and wages, and 303 per cent. in gross value of products. Since 1924 the capital investment has increased from \$5,744,502 to \$22,327,818 in 1937. The annual gross value of the Canadian silk industry is nearly \$10,000,000, according to the latest available figures.

Announcers of the British Broadcasting Company take singing lessons regularly to help them polish their voices for speaking into the microphone.

Husband (deceitfully)—"I'll show you who's running this house."

Wife—"You can't. It's her day out."

Little Helps For This Week

When He giveth quietness, who then can make trouble. Job 34:29.

Let Thy mercy's wings be spread O'er me; keep me close to Thee. In the peace Thy love doth shed Let me dwell eternally.

Be my ally in all I do Let me only seek Thy will Where the heart to Thee is true. All is peaceful, calm and still —A. H. Francke.

All the peace and favor of the world cannot calm a troubled heart; but where the peace is which Christ gives, all the trouble and disquiet of the world cannot disturb it. All outward distress to such a mind is but as the rattling of the bell upon the tiles to him that sits within the house at a sumptuous banquet. —Archbishop Leighton.

Agricultural machinery and petroleum products shipments were unusually heavy in 1928. Approximately 3,000 reaper-threshers were in use in Saskatchewan and, in most cases, were reported satisfactory.

There is an effective way to pleasantly relieve that distressing Cough—Buckley's Mixture is delicious and "friendly." Yet it acts like a flash in clearing the throat and chest. One dose stops coughing—and there are 49 doses in a 4-oz. bottle. All druggists sell it under a money-back guarantee.

WINDOLITE

The Improved Glass Substitute

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. **WINDOLITE** is supplied in rolls any length but in one width of 36 inches only. A square yard of **WINDOLITE** weighs about 14 lbs., while a square yard of glass of ordinary thickness weighs about 135 to 120 lbs. The improved **WINDOLITE** requires no varnish. **WINDOLITE** is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

Use **WINDOLITE** to let YOUR PLANTS YOUR CHICKENS YOUR CATTLE Bask in 100 % Sunlight Send for booklet "WINDOLITE"

Distributors: JOHN A. CHANTLER & CO., LTD.

TORONTO, ONT.

Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude salts. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For 50 years since its invention, it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn why it is an alkali which neutralizes excess acid in the crude ways. Go learn—now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

LOCAL ITEMS

Mr. J. Calhoun spent the week-end at Hanna.

Mrs. Nelson Murray spent the week in Calgary, returning Wednesday morning.

Clarence Young of Calgary is spending a few weeks at the home of his cousin Jas. Young.

If you have any little thing you wish to dispose of, try a classified advt. in the "Advance."

Even some of the Cereal curlers heard about the McTavish competition and a number of them were present on Monday night to witness the final game.

On Friday and Saturday the attraction at the Chinook Theatre is "Chang", the famous melodramatic sensation. On Friday evening, after the picture show, there will be a dance, music by the Chinook Orchestra.

Mr. S. D. Halloway, of the Soldiers' settlement Board, was a visitor to Hanna on Sunday.

J. H. Gustafson lost a horse last week. During that severe weather the animal got down in the straw shock and died.

Mr. R. D. Vanhook unloaded a carload of Hart-Parr tractors. Mr. Vanhook would be pleased to show the tractors to you.

A social evening was held at the Laughlin School last Friday. A load of young people attended from town. A very pleasant evening was spent in games and dancing.

Mr. and Mrs. R. C. Sibley, of Munson, Alta., are the happy father and mother of a bouncing baby boy, which was born to them in the Municipal Hospital at Drumheller on Jan. 21st. Both mother and son are getting along nicely.—Cereal Recorder. Mrs. Sidley is known to many in Chinook, where she attended school as Miss Kathleen Walldroff.

Leonard Cooley left on Tuesday for Calgary on business.

We are glad to report that Mrs. Brodine is improving.

Born—To Mr. and Mrs. H. B. Allan recently, at Hanna Hospital, a daughter.

Two local rinks attended the bonspiel at Youngstown this week but, unlike other years, did not get into the finals.

Mrs. Johnson of Cereal, is visiting at the home of her brother, Mr. Brodine, this week.

At the hockey game which was played at Cereal this week between Sibbald and Cereal, Sibbald won.

Our member, Lorne Proudfoot, M.L.A., left on Friday for Edmonton to be present at the opening of the Legislative Assembly.

The Ladies' Aid of the United Church, will meet on Wednesday, Feb. 13th at the home of Mrs. Lloyd Robinson.

Miss Caldwell of Calgary, who taught school at Laughlin for two years was married last week to Ray Orvis of Lanes.

Mrs. Anderson, of Hanna, arrived in Chinook on Wednesday morning and will visit at the home of her brother, L. Jones.

Rev. Chas. E. Thompson, the District Superintendent of Nazarine Church, will conduct the service at Colholme Nazarine Church at 11 a.m. on Sunday, Feb. 10th. All are welcome.

Mrs. Ralph Thompson, of Hayman, Alberta who has been visiting her sister, Mrs. H. Butts, for the past few weeks, is at present visiting at Kinmundy, at the home of her father, Mr. Seager.

The Carlson Bros. have just completed the building of their new home.

Mr. H. Butts' little daughter has had a very bad attack of the "flu," but we are glad to report she is on the mend.

Miss Dorothy Roberts was a Calgary visitor this week. Miss Roberts is taking a much needed rest after her strenuous work at the Bank and is at the home of her parents, Mr. and Mrs. A. E. Roberts.

The Woman's Institute was held at the home of Mrs. O. Nelson on Wednesday, Feb. 6th. Mrs. Nelson and Mrs. Rennie being joint hostesses. There were fourteen members present and one visitor. All answered to the Roll-Call, being "How can we make the meetings more interesting and profitable." Mrs. Todd gave a reading which was much appreciated by all, the title being "Jills of all trades filled with unusual occupations of women."

COD LIVER OIL AND ITS USE

By Alex Taylor Hatchery, Winnipeg

It has been found that feeding 2 per cent of Cod Liver Oil in the mash of the breeding birds during the winter months, results in a five-fold increase in the anti rachitic and fat A soluble vitamins.

When chicks are hatched from these eggs and absorb the rich yolk into their intestines, they are fortified against rickets as far as outward symptoms are concerned for the first three weeks.

It pays to give the baby chicks a rich inheritance from their mothers, in their first feed, the yolk. And then, particularly, if it is early in the season, go on and feed the chicks a little cod liver oil.

Here is what it does. When a chick is hatched, it has legs but no bone. The best you can call it is cartilage or gristle. Under natural conditions the sunlight would pour down upon the chicks and the shorter rays, or ultra violet light, would enable the chicks to utilize the mineral matter in its feed in developing the gristle into bone.

Under present day artificial conditions of rearing, especially early in the season, when chicks are indoors, they can't get the benefit of the sun's direct rays. Feed them as much mineral matter as you will, and their bellies will grow but their legs won't harden. They get "leg weakness" or rickets. Cod liver oil added to their ration, although it does not contain a bit of lime to make bone, contains the vitamins necessary to enable the body organism of the chick to utilize the food elements in the rest of its ration and build a bony frame work that is hard and sound to support the growth of the muscles and tissues.

Feed 2 per cent cod liver oil to your breeders this winter and then 1 per cent to your early chicks next spring, and you will have better chicks, lose fewer of them and do away with the old bug a boo of leg trouble.

A hen can only produce up to her capacity when she is fed so that all parts of the body are nourished.

Egg production depends first on how the hen was reared. Large digestive and productive capacity are due to the chick having obtained the feed and care which makes most of its inheritance.

Ste. Petronille

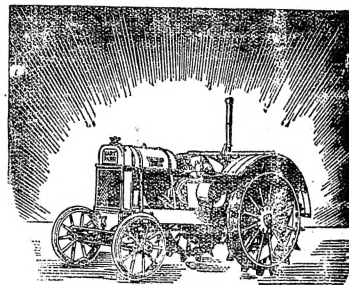

Jack Strathdee, the very able winter sports director at the Chateau Frontenac, his friends will be pleased to learn, is losing weight. Jack runs a summer camp at French River in the fishing season and he took his present job for the reason that he wanted to rest and draw a salary at the same time. When he has time to reflect, and this is seldom, he lones for the easy job of operating a camp and handling a crowd of Indian guides. He finds no rest, for during every daylight hour there is something doing on the ski-bill, on the rink, on the slide, and a hundred people to provide with sports equipment and direction. They no longer sit at all. The air is bracing, refreshing and there is fun.

In the group above one sees the director assisting Their Excellencies Lord and Lady Willington who have just come down the slide for the third time. The other group perhaps explains why he finds so much pleasure in his work and why he has taken up skiing again. There is also a picture of his rink which shows how the slide in the background drops down steeply from the chateau.

But take the other picture. This will show you Jack Strathdee's most recent discovery. Beyond the does and the terrace is a field of free ice. Beyond that the life of Orleans is a shadowy form. Now to the left of the island, just above the house, stands a great stone and evokes of crystal and opaque ice buried themselves in a mass, east reefs of glistening pinnacles to the sky in one glorious chaos and screeching, growlingly settled down. Then the mayor of St. Gregoire and the mayor of Ste-Petronille set out, each armed with a small spruce cutting. They met somewhere in the centre of the river, solemnly shook hands, and the ice bridge was declared open. It was after that, that the sports director drove over and discovered Ste-Petronille with its ski slopes and toboggan and snowshoe prospects, and also the "Catalogue". The "Catalogue" has a rubble-stone fire place of catalogue about the floor and as window drapes, the oldest old furniture and night bed-room and, above all a splendid cuisine. It is less than one hour from Quebec and is hailed as a great discovery.
